Allowable Subject Matter

1. Claims 1-10 are allowed.
2. The prior art of record fails to disclose or suggest features recited in the amended claims.
3. The following is an examiner's statement of reasons for allowance: The application has recited in independent claims 1, 5, 9 & 10 describe the use of icons associating the character classes. This feature is not described in Microsoft Word reference because the character classes represent a unique feature that allows the spacing to be set for all of the characters of one type. Instead Microsoft word describes spacing for words not the actual individual characters, doing so manually would be laborious. In addition the dialog box presented to the user describes the character classes by using Icons that are representative of the character. The Word reference does not explicitly teach the spacing of characters that include an icon with a character representing all characters of that class. In addition the claims of the following application differs from the claims of the double patenting reference US 6,928,611 filed Sep 25, 2001, published Aug 9, 2005 by McCully same assignee. The current application describes the **icon indicators** that associate character classes has described in the independent claims "icons representing the character class for the previous character and an icon representing the character class for the next character". McCully uses a table but does not display the characters in a dialog box that includes icons showing the character class for the previous and next character. The advantage to having icons is during text

composition letting the user immediately know what item is being set to avoid setting spacing for incorrect characters by using icons to display these characters.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
